

To demonstrate compliance with the United States Food and Drug Administration’s (FDA) bottled water standards, BODYARMOR periodically analyzes BODYARMOR SportWater to ensure that our consumers are receiving safe and purified water.

The following tables provide an example of a typical annual BODYARMOR SportWater analysis, conducted by an independent certified laboratory. The water analysis demonstrates that BODYARMOR SportWater is in full compliance with bottled water quality standards

Residual Disinfectants

ND: Not detected

*MDL: Method Detection Limit. These values reflect the lowest concentration of substance that can be accurately quantified and detected by the applicable testing method.

**MCL: Maximum Contaminant Level. This is the highest level of substance allowed by law in drinking water. The MCLs are the federal MCLs set by the EPA and FDA, unless in those cases where no federal MCL exists.

***Level Found: average of representative samples from all BODYARMOR SportWater Bottling locations.
